

LS Forecourt

Fuel your margins with a one-stop gas station software solution

LS Forecourt

The fully integrated management software for gas stations, powered by Microsoft Dynamics.

Run a successful forecourt business — from the pumps, to the gas station, to the back office — with just one powerful, flexible solution. The system instantly replicates all information across the organization, so that you can always take informed business decisions based on up-to-date sales figures.

LS Forecourt includes:

-  Extensive pump control from POS
-  Supply chain management
-  Price management tools
-  Wet stock management
-  Retail and hospitality tools

LS Forecourt will help you:

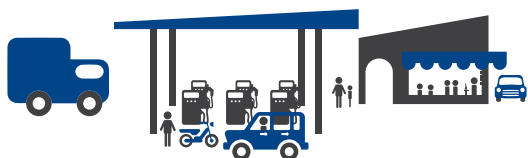

- Improve operational efficiency by managing your whole value chain from HQ
- Cut IT costs by using just one application for all forecourt operations
- Prevent losses, including leakage and theft, with wet stock management
- Manage prices flexibly to increase your competitiveness
- Pin-point your business's strengths and weaknesses with the powerful BI reports
- Handle your wet stock more precisely
- Manage your c-store and restaurant

Superior service

Empower your staff and offer great customer service

Equip your staff with powerful selling tools, gain efficiency and make your customers happy and loyal. Offer top-notch customer service with:

- Quick and precise transactions at POS
- Faster service, as all staff uses the same, intuitive graphic interface across the whole organization
- Customer rewards across the channels with in-store, online and mobile loyalty schemes and offers

Total overview of stock and production

Manage your inventory effectively

Gain a holistic view of your inventory processes with LS Forecourt. Track inventory transactions and production costs, and match orders to deliveries at head office. Maximize fuel margins and determine the optimal pricing. The system includes modules for waste management, item replenishment for your retail and hospitality operations, as well as tools for automatic replenishment of wet stock based on sales history or stock levels. Fuel Inventory Management optimizes the procurement and sale of fuel with demand forecasting, fulfillment, and management of sales, purchase orders and financials.

Immediacy & efficiency

Control your whole operation from central office

The system's powerful modules will provide you with:

- Real-time overview on POS terminals, store systems, inventory and merchandising
- Ability to schedule automated price changes from headquarters, forcing prices into effect even when the station is unmanned
- In-depth analyses of sales and performance with a host of reports and Business Intelligence

Large suite of management tools

Power up your gas station and c-store

Our system addresses all the aspects of a forecourt business. Use this powerful management system to:

- Accurately manage wet stock, prevent loss and detect leakage
- Protect your margins with a suite of loss prevention tools, complete with critical event registration
- Gain full visibility of your supply chain, from import, to delivery by fleet, to sale
- Implement a wide variety of flexible pricing structures, so that you can always be competitive
- Speed up your processes with automations at the pump

Powerful and dynamic

Gain agility and control with Microsoft Dynamics

LS Forecourt is developed on top of Microsoft Dynamics ERP. This comprehensive solution delivers value to organizations by affording them greater agility, increased control of financials and effective management of the supply chain. The system also guarantees total interoperability with other Microsoft solutions.
