

A functionality-rich retail Point of Sale
to manage your business anytime, anywhere.

LS Express offers all the functionalities you need in a retail POS, in the familiar business environment of Microsoft Dynamics 365 for Financials. Run the setup wizard, and start selling in minutes.

A complete online POS system

All the core functions you need to run your retail business, straight out of the box. The LS Express POS is platform-independent: use it on tablets, mobiles and computers running Windows, iOS or Android. The system is fully optimized for touch screen, making it an ideal fit for dynamic businesses looking for a flexible, mobile Point of Sale. Although no customization is required, you can personalize the POS and receipts, to better suit your business needs. As LS Express runs in the cloud, you can always keep track of your sales in real time, wherever you are.

Total Microsoft Dynamics integration

LS Express is totally integrated in Dynamics 365 for Financials, and shares the familiar Microsoft look and feel and business logic. Always be on the latest version: the system will update automatically at every new release. The integration to the whole Microsoft suite provides you with infinite possibilities to improve your service and increase your profitability. Customize your receipts in Microsoft Word, use your sales data to generate forecasts or run your customer sales history through Microsoft's Power BI to optimize your purchasing and get personalized recommendations.
